Light rain showers	Light rain showers	Light rain showers	Light rain showers	Light rain showers	Partly cloudy (night)
Precipitation probability					
40%	40%	30%	30%	30%	20%

Forecast for Tuesday 27 Sep 2022

Weather: A showery day, particularly during the morning, but probably fewer showers than on Monday with some drier and brighter periods during the afternoon. Mostly dry during the evening, but showers will continue in the west. Breezy, especially at higher levels where a strong north-westerly wind will continue, making it feel cold.

Chance of cloud-free hill tops above 600m: 90%.

Low cloud and visibility: Periods of cloud above 800m, with occasional patches as low as 600-700m during any prolonged showers. This will give periods of poor or very poor visibility over the highest summits at times. Outside of the cloud and more generally at lower levels, visibility will be very good with excellent air clarity and distant hills clear to see. Sudden deteriorations at all levels during showers.

Valley	8/6	10/8	13/10	11/9	10/8	9/8	8/6
Freezing Level*	1400m	1400m	1500m	1500m	1500m	1400m	1400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts of up to 40mph are possible on some summits and this will make for some challenging walking conditions on exposed ridges. The wind will give a significant and unseasonable wind chill with it feeling below freezing on the highest summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Tue 27 Sep 2022	6.2mm	7.6mm	7.6mm

Forecast for Wednesday 28 Sep 2022

Weather: Further showers are likely through the early hours of Wednesday but during the daytime the showers are likely to become confined to far western hills. Overall a drier day than Tuesday, with more sunny spells and winds easing to become moderate. Remaining cold in the wind at higher levels.

Maximum wind: North-westerly 20 gusting 30 mph.

Chance of cloud-free hill tops 600m: 90%

Low cloud and visibility: Periods of cloud may briefly affect the highest summits, but most hills will be cloud free. Very poor visibility in cloud but otherwise visibility will be very good with excellent air clarity and distant hills clear to see. Sudden deteriorations at all levels during any showers.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 13 Celsius.
At 600m: Plus 3 Celsius rising to plus 8 Celsius.
Freezing level: Above the summits
